PROFESSIONAL SUMMARY

Motivated Frontend Developer with hands-on experience building responsive, accessible web applications using HTML5, CSS3, JavaScript, React, and Tailwind CSS. Proficient in REST API integration, cross-browser compatibility, and Git version control workflows. Self-driven learner with 3 completed solo projects and a strong foundation in component-based architecture. Actively seeking a frontend internship to contribute to real-world products and grow within an agile team.

TECHNICAL SKILLS

Languages	HTML5, CSS3, JavaScript (ES6+)
Frameworks	React.js, Tailwind CSS
Tools	Git, GitHub, VS Code
Concepts	Responsive Design, REST APIs, Fetch API, Cross-browser Compatibility, Accessibility (a11y), Component-based Architecture, Git Workflow
Learning	Node.js, Express.js, EJS Templating, Full-stack Development

PROJECTS

Currency Converter | *HTML5 · CSS3 · JavaScript · Fetch API · REST API* | [Github](#) | [Demo](#)

- Integrated ExchangeRate API to fetch live exchange rates for 150+ currencies, rendering results in under 300ms.
- Built a swap feature to instantly reverse source and target currencies, reducing user interaction steps by 50%.
- Rendered country flag icons dynamically via dropdown, enhancing visual UX across all 150+ currency options.
- Implemented cross-browser compatible layout with zero external libraries or frameworks.

Stone, Paper & Scissors Game | *HTML5 · CSS3 · JavaScript* | [Github](#) | [Demo](#)

- Built a fully interactive browser game using vanilla JavaScript DOM manipulation — no libraries or frameworks.
- Implemented real-time score tracking for player and computer across unlimited game rounds.
- Handled 3 distinct input states with randomised computer logic, tested across 100+ game sessions.
- Achieved responsive layout across desktop and mobile screen sizes using pure CSS.

Amazon Homepage Clone | *HTML5 · CSS3* | [Github](#) | [Demo](#)

- Recreated the full Amazon homepage UI including navbar, hero banner, product category cards, and footer.
- Applied responsive design techniques to support 3 breakpoints (mobile, tablet, desktop) without any CSS framework.
- Demonstrated layout precision and real-world UI structure purely through semantic HTML5 and CSS3.

EDUCATION

B.Tech in Computer Science — Future University | 2024 – 2028 | Uttar Pradesh, India

ADDITIONAL

Soft Skills: Quick Learner · Problem Solving · Attention to Detail · Team Collaboration · Self-Motivated
